Summary

AI and automation-focused developer with 1.5 years of professional experience designing intelligent systems, microservice architectures, and data-driven pipelines. Skilled at translating complex operational problems into optimized, scalable software solutions. Multiple national hackathon winner with a strong track record of measurable impact across enterprise and field environments.

Skills

TECHNICAL SKILLS — Competent

- **AI & Optimization:** Machine learning, heuristic & metaheuristic algorithms, fuzzy logic, constraint-based optimization.
- **Software Development:** Full-stack, RESTful API design, relational & non-relational databases, containerization.
- **Data & Automation**
- **Tools & Platforms:** Power BI, Excel, Linux environments, version control, API testing.

Languages

Spanish (Native)

English (B2)
Oxford English Certification – In Progress

German (Basic - A1)

Professional Experience

AI Developer – Intelligent Route Optimization System, MIAA

05/2026 – Present | Aguascalientes, Mexico

- Designed and deployed an AI-powered route optimization system for field notifiers, solving the TSP at operational scale, reducing average travel time by ~35% through metaheuristic algorithms applied to real-world geospatial data.
- Optimized system performance through strategic caching of distance matrices, reducing redundant computation by ~70% under concurrent load.

Software Developer – HR & Organizational Systems, MIAA

04/2026 – 05/2026 | Aguascalientes, Mexico

- Architected a full-stack organizational management system covering the complete hierarchy of directorates, sub-directorates, departments, and positions, serving as a core internal tool for enterprise HR operations.
- Reduced manual org-chart update time by ~60% through dynamic, role-based interfaces that enable real-time structural changes without backend intervention.

Automation Intern Nov 2024 – Mar 2025, Datallizer

11/2024 – 03/2025 | Aguascalientes

- Built an automated customs quotation management system, reducing manual processing time by ~30% and eliminating data entry errors across internal workflows.

Education

B.S. in Information Technology and Digital Innovation,

Metropolitan Technological University of Aguascalientes
09/2025 – Present | Aguascalientes, Mexico

Associate Degree (TSU) in Artificial Intelligence,

Metropolitan Technological University of Aguascalientes
08/2023 – 07/2025 | Aguascalientes, Mexico

Awards

1st Place – Environment Vertical "BioTerra", ICP. Medellin, Colombia

05/2024

- Developed a smart agriculture system with real-time soil monitoring and blockchain-based traceability.
